

Life Strategies Feature of the Month: November 2015

CERIC 2015 Survey of Career Service Professionals

With over 1000 respondents, the 2011 survey of career service professionals provided important insights into research/education issues, career competency, and career mobility. A highlights report can be accessed at <http://ceric.ca/survey-of-career-service-professionals/>.

As the career development landscape continues to evolve (e.g., changes to funding service models, advances in technology, and shifts in the economy), CERIC is repeating the survey, allowing them to better understand the current state of career services in Canada and what shifts have happened since the 2011 survey.

If you are a career professional working in Canada, please take the time to complete the 20-minute survey at http://fluidsurveys.com/s/CERIC_2015_Survey_Sondage/?l=en.
